Wonder in every drop

NOBILI

Transform the water from your mains!

Water is one of the key elements for the successful outcome of all the tasks we carry out daily in the kitchen: Nobili Sorgente systems will provide delicious, pure water, chilled at the ideal temperature or with the addition of just the right amount of carbonation. Moreover, hanks to the energy-efficient water heater, you can enjoy instant

boiling water, reducing preparation time. Sorgente is a conscious, modern and sustainable choice that is going to allow you to get rid of single-use bottles from your daily routine: for over 70 years Nobili is driven by the passion to combine the wonder of water with the elegance of design and technical excellence of each of its taps.

What is the ideal system for your lifestyle?

NOBILI

sustainability

practicality

time

health

Choosing a mixer equipped with a filtration system allows you to get rid of disposable bottles from your daily routine: you no longer have to load or move heavy weights to have fresh, purified water at hand at any time. You can forget about needing storage space for bottles and you'll be able to save time required to stock up on your water supplies.

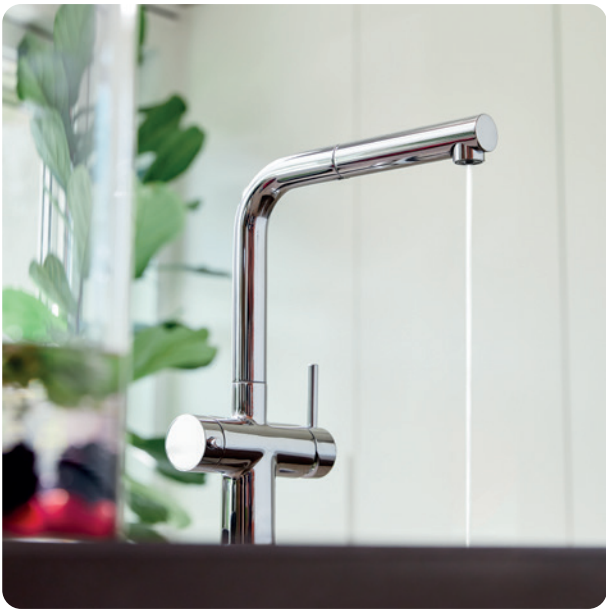

The five layers of the BWT Zinc + Magnesium filter trap odours, flavours and any unwanted substances in the water mains. Additionally, the water is supplemented with Magnesium and Zinc, which delivers the perfect combination of minerals and trace elements that are essential for the health of any family member.

So, let's
drink more
water!

Filtered water *and* running water

Left knob: delivery of filtered water

Right knob: delivery of running water

Sorgente Filtra turns water from the water mains into purified water with a fresh and natural flavour, removing any taste-altering substances such as chlorine and heavy metals (copper, lead or nickel). Thanks to the five layers of filtration, even the finest particles are removed, without taking away essential minerals and leaving the water perfectly

balanced. The separate internal ducts allow you to choose the type of water you want at any time: the knob on the left dispenses natural filtered water at room temperature, while the knob on the right dispenses mixed running water. Some models are fitted with a practical pull-out hand shower, which comes in very handy at the sink.

*Water...
wherever you like!*

Endless tasty recipes

Detox water redcurrants and blackberries

1 lt Filtered water
150 gr Fresh redcurrants
150 gr Blackberries
10 Mint leaves
½ Lemon

To stay healthy, constant physical exercise accompanied by a wholesome diet is essential. It is equally important to drink plenty of water and stay hydrated. With Sorgente Filtra, you can create endless tasty and healthy recipes using your tap water, delivering a variety of beneficial effects on both body and mind.

Wellness and freshness

AQA drink Zinc + Magnesium BWT filter gives tap water the perfect combination of minerals (Magnesium) and trace elements (Zinc). Magnesium is a very important mineral for our well-being: it keeps us fit and healthy for dynamic day-to-day life, stimulates the cardiovascular system, boosts mental ability and plays a key role in our nervous system,

helping us relieve everyday stress. The addition of Zinc adds freshness to the water, supports the immune system and has a positive effect on skin and hair, contrasting the negative effects of free radicals. The BWT filter also provides optimal protection against limescale: the result is pure, refreshing and tasty water for hot and cold drinks.

1. AQA drink Zinc + Magnesium BWT filter, 650 litres capacity (22 °f), size H 360 mm - ø 88 mm
2. Filter capacity control flow meter

Bolle

The wonder
of a hot
cuppa...

cook

blanch

sanitize

... and much more!

Sorgente Bolle is a real help in day-to-day domestic life: to cook a plate of spaghetti in record time, to make a cup of tea or herbal tea on the fly after a cold day outdoors, to blanch vegetables while retaining their colour and organoleptic properties, to sanitize a baby's bottle, and much more... It's wonderful to turn on the mixer and have boiling

water instantly, so you don't have to wait for it to boil. The high-efficiency water heater, has a capacity of approximately 4 litres, which is ideal for most preparations. It's located underneath the sink and leaves enough free space to store tools and accessories inside the cabinet, making it very tidy and well-organised.

*I'm so hungry...
how long until
the pasta's
ready?*

A close-up photograph of a modern, polished chrome kitchen faucet. The faucet is set on a dark, textured countertop. Water is flowing from the spout into a white pot. The water is bubbling, suggesting it is hot. The lighting is soft, highlighting the metallic sheen of the faucet and the texture of the countertop.

*In a bit,
my dear!*

*Just
the
cooking time!*

Electronic or mechanical?

"Child-lock" system patented by Nobili

Opening boiling water supply

Sorgente Bolle is available in an electronic or mechanical version: in the electronic models, the boiling water dispensing (indicated by the red LED ring lighting up) begins and remains active as long as you press the knob, stopping when it is released to avoid accidental contact with high temperature water. Even with the mechanical version safety is at

the highest level: the "Child-lock" system (patented by Nobili) allows the device to be operated only through a combined movement of pulling and turning the knob, making that operation extremely complicated for a child. Both versions feature the "Pot filler" function which allows continuous hands-free boiling water dispensing.

The perfect combination

The join between the Gioia filter and the 316 L stainless steel water heater is the perfect combination. In addition to protecting your water heater from corrosion and limescale build-up, the Gioia filter improves the taste of your water: through its 5 filtration stages, it reduces the presence of heavy metals and eliminates any harmful substances,

including certain microplastics, maintaining the proper mineral balance and a neutral pH of water. The pressurised 316 L stainless steel water heater, equipped with a safety valve and with a capacity of approximately 4 litres, heats and maintains the water at a constant temperature of 103 °C, allowing the mixer to dispense water at 99 °C.

1. 316 L stainless steel water heater, 4 litres capacity, size H 340 mm - \varnothing 229 mm
2. Gioia 5-stages filter, 1.700 litres capacity (18 °f), size H 295 mm - \varnothing 100 mm
3. Filter capacity control flow meter (optional)
4. Electronic connection box (included in the electronic version)

SORGENTE

Frigida

The wonder
of chilled and
sparkling water...

The water...

Running water

The water from the water mains is normally controlled and safe, but you can have much more.

Filtered water, room temperature

Water purified from any taste-altering substances with a fresh and natural flavour.

*you have always
wanted!*

Filtered water, chilled

Up to 16,5 litres/hour of chilled filtered water at a temperature between 4 and 10 °C.

Filtered water, chilled, sparkling

Up to 1,2 litres, instantaneously, of chilled sparkling water at a temperature below 5 °C.

Brrr...
That's cold...

4°C

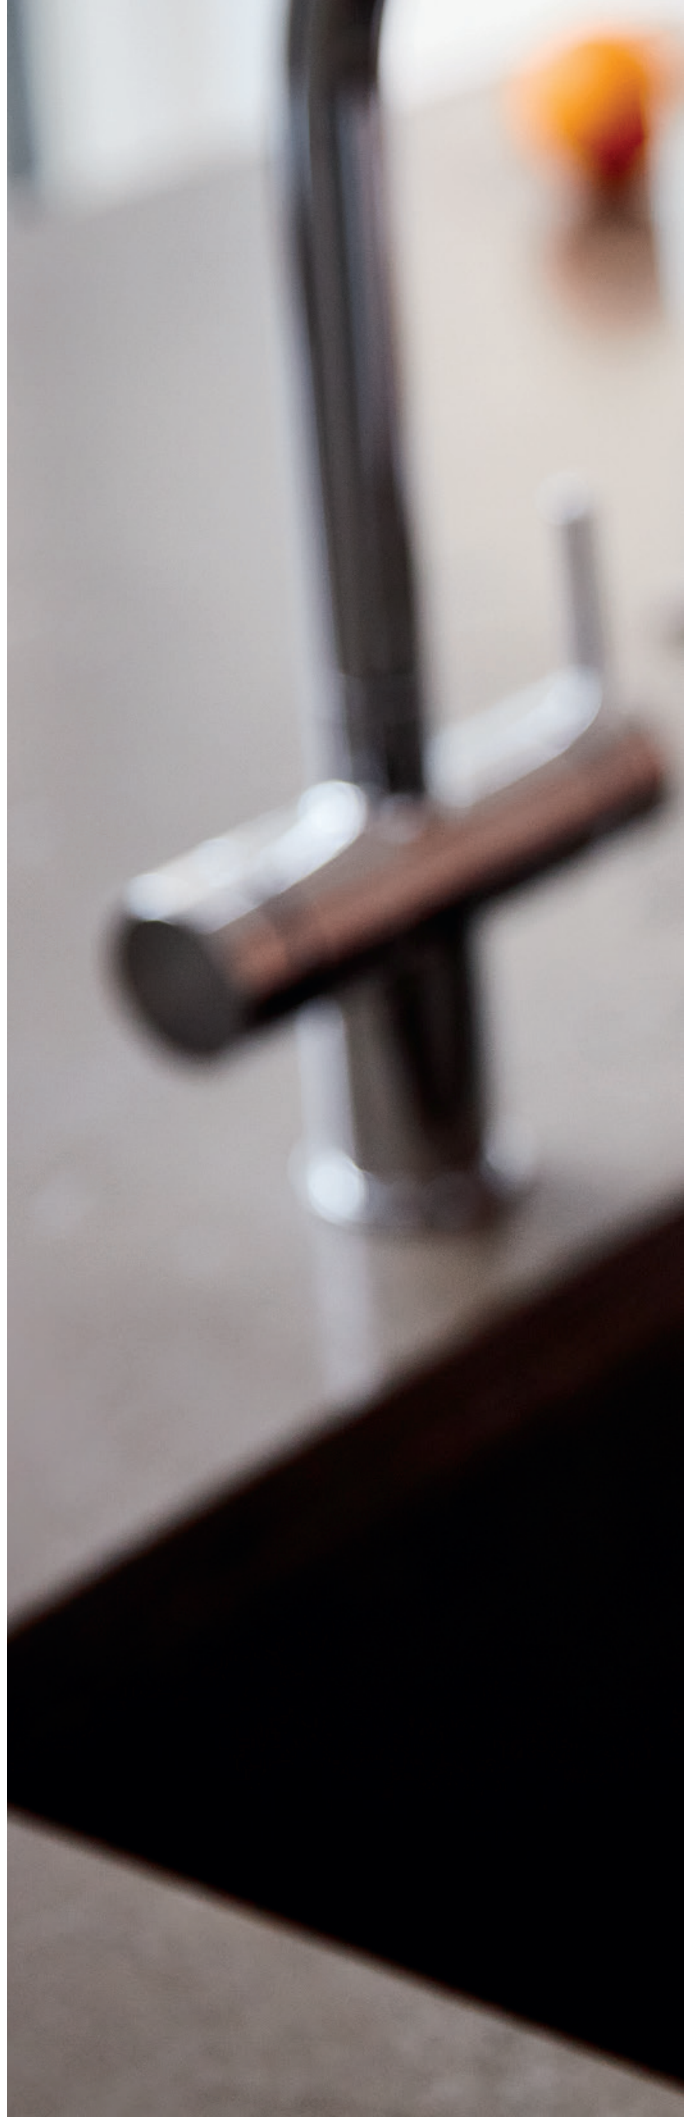

Um...
How
fizzy?

Managing the Sorgente system is easy and straightforward thanks to the Nobile Sorgente App, connected to the mixer tap via Bluetooth interface: it allows you to set the temperature, the degree of carbonation of the water and even to dispense a specific amount and also check the remaining capacity of consumables.

Take care of yourself

Sorgente Frizza instantly dispenses mixed running water and three types of filtered water: room temperature, chilled and chilled sparkling. The device holds within itself a 425 gr CO₂ canister (capable of dispensing up to 60 litres of sparkling water and compatible with most spare parts commonly found on the market) that adds the desired degree

of carbonation to the filtered water, and the Gioia filter, which through its 5 filtration stages purifies it by reducing the presence of heavy metals and removing harmful substances, protecting the device from corrosion and limescale build-up while also enabling the purification and maintenance of the mineral balance of the water dispensed.

1. Sorgente Frizza device (minimum installation requirements L 30 x D 55 x H 49 cm)

Inside the device:

- Gioia 5-stage filter, 1.700 litres capacity (18 °f), size H 255 mm - ø 95 mm
- 425-gram CO₂ canister, size H 358 mm - ø 60 mm

ef!

Plenty of functions...

White led: stand-by

The white led on the left-hand knob indicates that the mixer is on and working properly, in stand-by mode, awaiting your selection of the desired type of water.

Blue led: filtered water

Turn the knob and the colour changes to blue: the mixer is ready to dispense filtered water, at room temperature (press the knob once) or chilled (press twice).

*just
one tap!*

Green led: sparkling water

The green light indicates that the mixer is ready to dispense filtered chilled sparkling water: the amount of CO₂ present in the water can be customised using the Nobili Sorgente App.

Red led: boiling water

The red light indicates the mixer is in filtered boiling water mode: dispensing begins and remains active as long as you press the knob, stopping when it is released.

Quick and easy!

Caring and maintaining the Nobili Sorgente system is quick and easy: the front panel, held by a magnetic system, allows the opening with a simple gesture. The LED indicators on the device allow you to keep the operating status under control: no special equipment or skills are required to take care of the Sorgente System.

All-in-One

Sorgente Frizza & Bolle is the All-in-One system designed to dispense instantly mixed running water, boiling water at 99 °C and three types of filtered water: room temperature, chilled and chilled sparkling. The device is quick and easy to install: it does not necessarily require the intervention of specialised personnel and does not force you to

revolutionise the area underneath your sink. The device combines everything you need keeping the footprint compact and allowing free space inside the cabinet: it fits in a compartment as small as 30 cm wide as it does not require ventilation on the sides but only in the back. With a little space you will have a complete, high-performance appliance.

1. Sorgente Frizza & Bolle device (minimum installation requirements L 30 x D 55 x H 49 cm)

Inside the device:

- Gioia 5-stages filter, 1.700 litres capacity (18 °f), size H 255 mm - ø 95 mm
- 425-gram CO₂ canister, size H 358 mm - ø 60 mm

Why choosing a Nobili filtration system?

It's wonderful

Because you can have the water you have always dreamed of directly from your kitchen tap.

It's sustainable

Because it is a conscious choice that contributes to reducing the usage of plastic bottles.

It's efficient

Because it significantly reduces the time spent on preparing food and hot beverages.

It's technological

Because through a dedicated app, it allows to control all the system functions.

*Because
that's all
you need!*

It's guaranteed

Because Nobili products are made with the best materials and tested to high standard quality levels.

It's compact

Because it allows you to have an integrated system to get the water you need in very little space.

It's convenient

Because it allows you to save money on the purchase of bottled water by improving the water from your local water supply.

It's practical

Because it is low maintenance and does not require any specific skills to be carried out.

FILTRA

Sorgente Filtra is the range of mixers that allows separate dispensing of filtered water. It is supplied with the AQA drink Zinc + Magnesium BWT filter and a practical flowmeter with an (indicator) monitor to keep under control the remaining filter capacity.
